Barriers to Energy Efficiency of the Housing Stock.

Adam Bin M Raman

Abstract

Newly built houses only represent approximately 1% of the housing stock each year. It is estimated that by 2050 about two-thirds of the housing stock within the UK will have been built before 2005. Unless the energy efficiency of the current housing stock is addressed, energy consumption in the domestic sector will only rise above the current levels. This is a study of the factors that are preventing homeowners of the current stock of houses from upgrading their home to the current optimum energy efficiency standards. The study first looks at sources of carbon emissions in the domestic sector to allow an understanding of how energy is currently being used at home. Currently available technical measures to counter these problems are identified. A questionnaire and interview were conducted to identify why these solutions were not implemented. The questionnaire and interview were sent to a sample of homeowners of homes built in the late 19th century in Manchester which represents the majority of the existing housing stock built during the mass housing period in the UK. Homeowner have varying degree of awareness to the issue and varying degree of ability to address the issue.

理想とする企業像

以前は多くのことを自分で対応しなければなりませんでした。
今後は、さまざまな専門的スキルを持つ人たちが集まる大きな組織の一員として働きたいと考えています。
In the past, I had to do a lot of things on my own. In the future, I would like to work as part of a larger organization with people who have a variety of specialized skills..

法令遵守 , 調達, 税金, 人事部

hōrei junshu, chōtatsu, zeikin, jinji

自分の得意分野である創造的思考、持続可能な戦略、未来ビジョン、人間中心設計、そして事業開発に取り組み、将来に大きな影響を与えられる組織の一員として貢献したいと考えています。
I hope to contribute to an organization that can have a significant impact on the future by leveraging my expertise in creative thinking, sustainable strategy, future vision, human-centered design, and business development.

将来の目標

キャリア;
少子高齢化が進む中で、日本の取り組みは世界の模範になると考えています。
私は、その変化を先導し、世界に影響を与えられる存在になりたいと思っています
As the birthrate declines and the population ages, I believe Japan's efforts will serve as a model for the world. I want to be a leader in this change and have an impact on the world.

家族;
将来的には、自然の近くの日本の田舎で穏やかに暮らしながら、美しい投資物件に囲まれた生活を送りたいと考えています。
In the future, I hope to live a peaceful life in the Japanese countryside, close to nature and surrounded by beautiful investment properties.
